Hosting & Deployment Notes for ProEdge Property Group

Subject: Clarification on Hosting, Domain, and Developer Responsibility

To: ProEdge Property Investment
From: Adolphus Tshehla
Date: [2025/07/04]

Hosting Platform

The website will be deployed using Render.com as the hosting platform. This includes backend deployment (Django/PostgreSQL) and static frontend assets.

Hosting & Domain Costs

- Hosting fees (charged monthly or annually by Render) are not included in the website development fee.

- Domain name registration (e.g., www.proedge.co.za) is also separate and must be purchased/renewed by ProEdge.

- I will assist with:

  • Setting up hosting and domain connection during deployment

  • Providing a deployment checklist

  • Handing over login credentials and guides

Developer Responsibility Disclaimer:

As the freelance developer:

- I am not responsible for ongoing hosting payments, domain renewals, or third-party subscription fees.

- My responsibility ends after successful deployment and handover (unless a separate maintenance agreement is signed).

- All accounts created (Render, domain registrar) must be in the name of ProEdge and owned/managed by your team post-handover.

Deployment & Handover Includes:

- Render setup and deployment

- Environment configuration (production settings, env vars)

- Linking domain to hosting

- SSL certificate (via Render)

- PDF handover checklist with login details and hosting info
